GAUGE

Correct gauge is essential for proper size of garments. Needle and hook sizes given in instructions are merely guides and should never be used without first making a swatch to check gauge. To test gauge, make a sample swatch approx 4" square in the stitch, yarn and needle or hook specified. Then measure it, counting your stitches and rows carefully. If you have more stitches per inch than specified, try again with a larger size needle or hook; if fewer, try again with a smaller size. Keep trying until you find the size that will give you the specified gauge. **DO NOT HESITATE TO CHANGE NEEDLE OR HOOK SIZE TO OBTAIN CORRECT GAUGE.**

CONVERSION CHART

1 ounce	=	28.4 grams
1½ ounces	=	42.6 grams
2 ounces	=	56.8 grams
3½ ounces	=	99.4 grams
4 ounces	=	113.6 grams

We have made every effort to ensure that these instructions are accurate and complete. We cannot, however, be responsible for human error, typographical mistakes or variations in individual work.
